### Full job description

#### Your new company

A local, multi-disciplinary engineering consultancy specialising in design, sustainability, engineering and project management. They are focused on innovation and being seen as market leaders in their fields.

#### Your new role

This full-time role will see you taking a senior role in the risk management team and have you involved in coordinating projects, preparing cost estimates, budgets and schedules. You will use your proficiency in detail to prepare assessment documentation with analytical precision and to ensure client relationships and communication are maintained. You will use your expert knowledge and presentation skills to facilitate workshops including SIL, LOPA and HAZOP.

#### What you'll need to succeed

As this is a senior role you will have the following:

- Degree qualified electrical engineer
- Possess 10 or more years' experience in the industry
- Demonstrated experience in risk or functional safety including technical audits, hazard and risk identification, technical investigations and mitigation techniques.
- Background in industry and machinery (Highly regarded)
- Demonstrate advanced communication skills, both written and verbal, strong problem solving ability
- Have effective time management skills

#### What you'll get in return

You will be rewarded with an excellent working environment that encourages personal growth and development and supports you through internal training

and opportunities. You will have the chance to hone your skills across a number of engineering businesses and to deal with some of the area's most respected companies. A very attractive annual salary package is also on offer.
