### Full job description

#### Your new company

This Local Government department is focussed on making a difference in the community delivering services valued by the community. They are current facing some environmental challenges and looking for an experienced natural asset engineer to join their talented team on a short-term contract.

#### Your new role

As a Natural Asset Engineer you will provide asset management services and be responsible for the development and administration of policies and procedures to establish service standards that determine renewal works and maintenance needs in conjunction with asset operators.

You will be responsible for:

- Identifying and resolving complex problems relating to Asset Maintenance
- Negotiate effective outcomes for natural assets and infrastructure with stakeholders
- Provide specialist engineering advice on the repair and preservation of natural assets
- Provide emergency response for natural assets and coordinate environmental risk measures

#### What you'll need to succeed
