### Full job description

#### Your new company

A large consultancy company working with big 4 banks.

#### Your new role

- Identifying data sources
- Extracting, cleaning and manipulating data
- Collecting data
- Sourcing missing data
- Organising data into usable formats
- Analysing data to find answers to specific questions
- Setting up data infrastructure
- Developing, implementing and maintaining databases
- Assessing quality of data and removing or cleaning data
- Generating information and insights from data sets and identifying trends and patterns
- Preparing reports for executive and project teams
- Creating visualisations of data

#### What you'll need to succeed

- Strong mathematical & numeracy skills.
- Intermediate understanding of databases such as SQL Server, Oracle and SAP.
- Understanding of reporting & data visualisation tools such as Business Objects, PowerBI and Tableau.
- Understanding of website scripts such as XML, Javascript, JSON.
- Understanding of ETL framework and ETL tools including Alteryx and Microsoft SSIS.
- Digital marketing analytics tools including Google 360, Google Analytics, Google Tag Manager and Adobe Marketing Suite.
- Excellent analytical skills - the ability to identify trends, patterns and

insights from data.

- Strong attention to detail.
- Presentation skills – ability to write and speak clearly to easily communicate complex ideas in a way that is easy to understand.
- Problem solving skills.
- Communication skills with effective stakeholder management & conflict resolution skills.

### **What you'll get in return**

A good environment to work and approximately 90k – 120k salary plus superannuation.
