Full job description

Your new company

Recognised as leading the industry in IT and operations with its world-class platforms and processes, agile IT infrastructure, and innovation in everything from payments to internet banking and mobile apps.

Your new team

The Payment Services Utility team is a newly established area of the ES operating model that manages the end to end technology and operations for payments within the bank. This includes all real time, domestic, international and merchant payment services.

Your new role

You will be responsible for providing technical direction to the service delivery team. You must be technical oriented person with comprehensive experience in payments functional and technical landscape. You are responsible for delivering insights to support service operational integrity and maintaining application monitoring, performance tuning and testing.

What you'll need to succeed

- Payment domain knowledge in retail payments, Terminals, POS services
- Experience in application support, development/ testing or business / system analysis role in some of the technologies including Connex, Mainframe with assembler experience, .NET, Java.
- Experience working with Linux, UNIX and Windows platforms.
- Experience working in 24x7 support roster in an on-call and shift model.
- Experience with systems analysis, application support and continuous improvement initiatives.

What you'll get in return

- 12-month FTC with room for extension
- \$124K - \$168K per annum + Super
- Flexible WFH arrangements
- An inclusive team culture that promotes collaboration and innovation

What you need to do now
